

AMOL WABALE

Project Manager & Engineering Leader | Expert in High-Impact Software Solutions & Cross-Functional Team Leadership

+91-9595519028 | a.m.wabale@gmail.com | linkedin.com/in/amolwabale | Pune, MH, India

SUMMARY

- Senior Engineering Leader with over a decade of experience delivering high-quality, scalable software solutions. Proven track record in leading engineering teams to develop intuitive, impactful products, with hands-on expertise in technologies such as .NET Web API, ASP.NET MVC, Java Spring Boot, AWS, and more. Adept at working closely with product management, design leaders, and cross-functional teams to set strategic goals and execution roadmaps.
- Experienced in owning significant company goals, OKRs and driving their successful delivery. Skilled in collaborating with senior leadership to align strategies and navigate complex tradeoffs, ensuring the execution of roadmaps with visibility at the highest levels, including founders. Known for maintaining exemplary quality standards in systems and services, reflecting industry best practices for SaaS.
- Passionate about mentoring and developing leaders and engineers within my organization and beyond. As a Certified Scrum Master, proficient in Agile methodologies and Scrum ceremonies, including Sprint Planning, Daily Scrum, and Retrospectives. Committed to fostering collaborative environments, optimizing processes, and aligning technical solutions with business objectives to enhance customer experiences and drive innovation.

KEY SKILLS

- Technology: MVC Asp.Net, Web API, SQL, JQuery, C#, Angular, HTML, CSS, LINQ, .NET Core, Javascript, AWS, React, Python, Java, Spring Boot, Microservices.
- Tools: Visual Studio, SSMS, Dynatrace, New Relic, Splunk, Wireshark, SQL Sentry, Burp, Postman, TeamCity, SVN, JIRA, Coverity, Confluence.
- Management: Risk Management, Sprint Planning, Release Planning, Project Management, Mentoring, SCRUM, Cost Optimization.

KEY ACHIEVEMENTS

1. **Strategic Leadership:** Led the transition of 4 major projects from ZS Associates to LTIMindtree, driving a 40% growth in account revenue and increasing team headcount by 50%.
2. **Performance Optimization:** Spearheaded initiatives that enhanced system performance by 30% through the integration of advanced data exchange platforms and Amazon S3 for BI tools.
3. **Team Development:** Recruited and mentored a diverse engineering team, improving project completion rates by 50% and achieving a 20% boost in sprint efficiency.
4. **Client Solutions:** Innovated 15 IronPython hooks, empowering over 30 clients to customize functionality, reducing client-specific feature release cycles.
5. **System Upgrades:** Directed critical .NET Framework upgrades and server transitions, ensuring compliance with industry standards and enhancing system security.
6. **Operational Efficiency:** Implemented CI/CD pipelines and automated testing frameworks, reducing deployment times and ensuring consistent software releases.

WORK EXPERIENCE

Project Manager & Scrum Master

LTIMindtree | 2020 - Present

Projects: Javelin Incentive Manager, Call Plan Manager, Compensation Reports, Territory Designer, Communication Manager, Application Catalyst

- Led Three engineering teams comprising 12 Members, Managing 2 Active Projects and 4 Maintenance projects. Ensured adherence to coding standards, optimized design approaches, accurate estimates, and standard development practices.
- Involved in hands on coding & finalizing the implementation approach for Each User Story and System Design to ensure efficient logic and alignment with the existing system.
- Led the management of the Software Engineering function, making high-level decisions on complex projects to enhance product quality and customer satisfaction.
- Collaborated with product and architecture teams on product definition, technical design, and overall execution for the team.
- Ensured objectives and development plans were established and continuously reviewed, driving team performance and project success.
- Provided strategic thinking and leadership on application architecture, guiding teams in adopting advanced design patterns and secure coding practices.
- Managed budgets, forecasting, and cost allocation, optimizing resources while meeting business goals.
- Recruited, mentored, and retained top engineering talent, fostering a culture of continuous learning and excellence.

Senior Tech Lead & Scrum Master

Cuelogic Technologies (now LTIMindtree) | 2018 - 2020

Projects: Javelin Incentive Manager (JIM), Javelin Call Plan Manager (JCPM)

- Directed a team of 9 engineers in the design and delivery of full-stack software solutions, ensuring adherence to best practices and secure coding standards.
- Streamlined CI/CD processes, leading to more efficient and reliable software deployments.
- Coached teams on performance engineering, ensuring applications were built to scale and meet varying demands.
- Engaged in architecture and cost analysis for hybrid and public cloud environments, optimizing system performance and cost efficiency.

Software Engineer

Softlink International | 2015 - 2017

Projects: NCDR Registry Suite, Draeger Reporting Tool

- Designed and developed end-to-end product features, ensuring scalability, security, and maintainability of code.
- Led the deployment of applications on AWS, utilizing best practices in cloud architecture and automation.
- Implemented secure coding practices, automated testing, and performance tuning to optimize system efficiency and responsiveness.

EDUCATION

- Bachelor's Degree in E&TC | Maharashtra Institute of Technology | Pune, MH, India | 2012 - 2015
- Diploma in E&TC | Pimpri Chinchwad Polytechnic | Pune, MH, India | 2009 – 2012

CERTIFICATIONS

- Certified Scrum Master | SCRUM Alliance
- AWS Solutions Architect | Amazon Web Services
- Associate AWS Cloud Practitioner | Amazon Web Services
